JOB REFERENCE: FOR THE POST OF FULL STACK DEVELOPER

Dear haider,

i'm very eager to apply for the full stack developer position at your company as advertised on company website. I have been working in full-stack web development for 1 year. I have quite a lot of experience in full-stack web development. I am highly motivated for web development

For full-stack web development, I know HTML, CSS, tailwind, bootstrap, javascript, and react js which I use in the front end, and for the back end I use node js, express js, and Firebase. As a database I use MongoDB. I have done many projects.

I know you are going to do a lot and create something new. For this, you need a full-stack web developer. I think I can work together with you and give you something good. I will do my best for this job and your company

Thank you very much for reading my application. I am very interested to do this job. I want to talk to you more about this. I am waiting for your response.

Sincerely,

Nahidul islam fahad
